Continuation of Substance of Interview including description of the general nature of what was agreed to if an agreement was reached, or any other comments: Applicant discussed a proposed amendment to independent claim 1 and dependent claim 12. Applicant proposed to add language to claim 1 comprising an uninterrupted stream of control signal packets, and further elaborate on how there is no break between each transmitted packet. Examiner agrees that the addition of this language would distinguish over the 102 rejection as anticipated by Rosenhagen et al. '221. However, the addition of this language would require a further search. Applicant has also proposed removing the term software PLL in an amendment to fix claim 12.
